

Medical Board of California
Division of Licensing
Specific Language of Proposed Changes
International Medical Schools: Prospective Recognition

**Amend §1314.1 in Article 4 of Chapter 1 of Division 13, Title 16, California Code
Regulations to read as follows:**

(a) For purposes of Article 5 of Chapter 5 of Division 2 of the code (commencing with Section 2100), a medical school's resident course of instruction that leads to an M.D. degree shall be deemed equivalent to that required by Sections 2089 and 2089.5 of the code if the medical school offers the curriculum and clinical instruction described in those sections and meets one of the following:

(1) The medical school is owned and operated by the government of the country in which it is located, the country is a member of the Organization for Economic Cooperation and Development, and medical school's primary purpose is educating its own citizens to practice medicine in that country; or

(2) the medical school is chartered by the jurisdiction in which it is domiciled and meets the standards set forth in subsection (b) below.

(b)(1) Mission and Objectives.

The institution shall have a clearly stated written purpose or mission statement and objectives that include:

(A) The institution's broad expectations concerning the education students will receive;

(B) The role of research as an integral component of its mission, including the importance, nature, objectives, processes and evaluation of research in medical education and practice; and

(C) Teaching, patient care, and service to the community.

The institution shall have institutional objectives that are consistent with preparing graduates to provide competent medical care.

(2) Organization.

The institution shall be organized as a definable academic unit responsible for a resident educational program that leads to the M.D. degree. The manner in which the institution is organized shall be set forth in writing.

(3) Curriculum.

The structure and content of the educational program shall provide an adequate foundation in the basic and clinical sciences and shall enable students to learn the fundamental principles of medicine, to acquire critical judgment skills, and to use those principles and skills to provide competent medical care.

(4) Governance.

The administrative and governance system shall allow the institution to accomplish its objectives (i.e. its statements of the items of knowledge, skills, behavior and attitude that students are expected to learn). An institution's governance shall give faculty a formal role in the institution's decision-making process. A student enrolled in the program shall not serve as an instructor, administrator, officer or director of the school.

(5) Faculty.

The faculty shall be qualified and sufficient in number to achieve the objectives of the institution. A "qualified" faculty member is a person who possesses either a credential generally recognized in the field of instruction or a degree, professional license, or credential at least equivalent to the level of instruction being taught or evaluated. The institution shall have a formal ongoing faculty development process that will enable it to fulfill its mission and objectives.

(6) Admission and promotion standards.

The institution shall have and adhere to standards governing admission requirements and student selection and promotion that are consistent with the institution's mission and objectives.

(7) Financial Resources.

The institution shall possess sufficient financial resources to accomplish its mission and objectives.

(8) Facilities.

The institution shall have, or have access to, facilities, laboratories, equipment and library resources that are sufficient to support the educational programs offered by the institution and to enable it to fulfill its mission and objectives. If an institution utilizes affiliated institutions to provide clinical instruction, the institution shall be fully responsible for the conduct and quality of the educational program at those affiliated institutions.

(9) Quality Assurance System.

If the institution provides patient care, it shall have a formal system of quality assurance for its patient care program.

(10) Records.

The institution shall maintain and make available for inspection any records that relate to the institution's compliance with this section for at least five years, except, however, that student transcripts shall be retained indefinitely.

(11) Branch Campuses.

An institution with more than one campus shall have written policies and procedures governing the division and sharing of administrative and teaching responsibilities between the central administration and faculty, and the administration and faculty at the other locations. These policies shall be consistent with the institution's mission and objectives. The institution shall be fully responsible for the conduct and quality of the

educational program at these sites. If an institution operates a branch campus located within the United States or Canada, instruction received at that branch campus shall be deemed to be instruction received and evaluated at that institution. For purposes of this section, the term "branch campus" means a site other than the main location of the institution but does not include any hospital at which only clinical instruction is provided.

(c) The division may, on its own or at the request of an institution, determine whether that institution meets the requirements of subsections (a) and (b). The division shall have the sole discretion to determine whether a site visit is necessary in order to verify the accuracy and completeness of the data provided and to conduct an in-depth review of the program to determine whether the institution is in compliance with this regulation.

(d) An institution's failure to provide requested data regarding its educational program or to cooperate with a site team shall be grounds for disapproval of its educational program.

(e) If the division determines that a site visit is necessary, it shall appoint a site inspection team to conduct a comprehensive, qualitative onsite inspection and review of all aspects of the institution's operations to determine whether the institution complies with the requirements of subsections (a) and (b).

The fee for a site visit is all reasonable costs incurred by the board staff and the site team, payable in estimated form in advance of the site visit. If the cost of the site visit exceeds the amount previously paid, the board shall bill the institution for the remaining amount and shall not take action to determine the institution's equivalency until such time as the full amount has been paid. If the amount paid exceeds the actual costs incurred, the board shall remit the difference to the institution within 60 days.

The site team shall prepare and submit to the division a report that includes

(1) Its findings regarding the institution's compliance with the requirements of the law and this regulation;

(2) Its assessment of the quality of the institution as a whole and the quality of the institution's educational program, including any deficiencies; and

(3) Its recommendation whether or not the institution's resident course of instruction leading to an M.D. degree should be deemed equivalent to that required by Sections 2089 and 2089.5 of the code, including a recommendation regarding the correction of any deficiencies identified in the report. A copy of the report shall be provided to the institution, which shall have 60 days following the date of the report in which to respond to board staff as to any errors of fact or erroneous findings.

(f) Any recognition of an institution's resident course of instruction leading to an M.D. degree shall be prospective from the date of site visit evaluation. Any education obtained prior to that date shall not be accepted toward licensure.

(f)-(g) If an institution wishes to retain the division's determination that its resident course of instruction leading to an M.D. degree is equivalent to that required by Sections 2089 and 2089.5 of the code, or if it is currently being evaluated for such equivalency, it shall do the following:

(1) It shall notify the division in writing no later than 30 days after making any change in the following:

(A) Location;

(B) Mission, purposes or objectives;

(C) Change of name;

(D) Any change in curriculum or other circumstance that would affect the institution's compliance with subsections (a) and (b).

(E) Shift or change in control. A "shift or change in control" means any change in the power or authority to manage, direct or influence the conduct, policies, and affairs of the institution from one person or group of people to another person or group of people, but does not include the replacement of an individual administrator with another natural person if the owner does not transfer any interest in, or relinquish any control of, the institution to that person.

(2) Every seven years, it shall submit documentation sufficient to establish that it remains in compliance with the requirements of this section and of Sections 2089 and 2089.5 of the code.

(g) (h) The documentation submitted pursuant to subsection (f)(2) shall be reviewed by the division or its designee to determine whether the institution remains in compliance with the requirements of these regulations and of Sections 2089 and 2089.5 of the code.

(h) (i) The division may at any time withdraw its determination of equivalence when an institution is no longer in compliance with this section. Prior to withdrawing its determination of equivalence, the division shall send the institution a written notice of its intent to withdraw its determination of equivalence, identifying those deficiencies upon which it is proposing to base the withdrawal and giving the institution 120 days from the date of the notice within which to respond to the notice. The division shall have the sole discretion to determine whether a site visit is necessary in order to ascertain the institution's compliance with this section. The division shall notify the institution in writing of its decision and the basis for that decision.

(i) (j) The division may evaluate any institution described in subsection (a)(1) to determine its continued compliance with Sections 2089 and 2089.5 of the code if, in its sole discretion, the division has reason to believe that the institution may no longer be in compliance.
